## SUMMARY

MCA student with skills in Java, Python, SQL, MySQL, and Java Swing. Experienced in developing ERP systems, desktop applications, and AI-powered solutions. Completed a software development internship and possess strong problem-solving, teamwork, and leadership skills.

## PROFESSIONAL EXPERIENCE

**SRRS Software solutions pvt ltd,** *Intern Software Developer* 12/2025 – 06/2026 | Thane

**Software Development Intern | SRRS Software Solutions Pvt. Ltd.**

**Electric Cable Mini ERP System | SQL**

- Worked on an ERP solution for electric cable manufacturing and distribution processes.
- Developed and maintained functionalities related to cable manufacturing parameter generation, including product specifications, production parameters, and operational data management.
- Assisted in testing, debugging, and enhancing ERP features to improve system reliability and data accuracy.
- Identified and resolved **15+ software defects** during testing and debugging activities.

**Education Management System | SQL Server**

- Contributed to the development and maintenance of an Education Management System for managing student, faculty, attendance, and academic records.
- Developed and optimized database operations for managing **500+ student and academic records**.
- Designed and optimized SQL Server database queries and procedures for efficient data management and reporting.
- Assisted in system testing, bug fixing, and database maintenance to ensure smooth application performance.

## EDUCATION

**DY Patil school of humanities and sciences** 08/2025 – Present | Navi Mumbai

*Masters in Computer Applications*

**Vidyalankar school of Information Technology,** *BscIT* 06/2022 – 04/2025 | Mumbai

Cgpa:8.57

## SKILLS

**DBMS** (Strong understanding of Databases Management Systems concepts , including relational databases , normalization , indexing and data integrity) | **Python** (Proficient in Python with hands-on experience in application development, database management, API integration, automation, and AI-based projects.) | **Java** (Proficient in Java with experience in OOP, desktop application development, Java Swing, JDBC, and SQL database integration.)

## CERTIFICATES

**SQL and Database Management Training** (Acquired practical knowledge of relational databases, SQL queries, normalization, indexing, database design, and data management techniques for enterprise applications) | **AI & Machine Learning Certification** (Gained hands-on experience in machine learning, predictive analytics, model training, and AI development using Python and industry-standard tools.) | **NPTEL:Cloud Computing(Ongoing)** (Developing knowledge of cloud computing, virtualization, distributed systems, and cloud service models through practical assignments.)

## PROJECTS

**Fitness Tracker** 11/2025 – 02/2026

AI-Powered Fitness and Nutrition App | Python, MySQL, Gemini API

- Developed an AI-powered fitness application with user management, food logging, and health tracking features.
- Implemented calorie tracking, BMI calculation, and personalized meal recommendations.
- Integrated Gemini API for AI-driven nutrition insights and fitness guidance.
- Designed dashboards to visualize fitness progress and wellness metrics.
- Implemented a food recommendation engine capable of generating personalized meal suggestions from **50+ ingredient combinations**

**Car Rental Manager,** *CarERP| Java, Java Swing, JavaBeans, SQL* 04/2024 – 05/2024

CarERP | Java, Java Swing, SQL

- Developed a Car Rental Management System with customer, vehicle, and booking management features.
- Implemented SQL-based database operations and automated rental tracking with billing support.
- Enabled real-time vehicle availability monitoring and efficient rental operations.

**PlantSambhalo** 06/2025 – 07/2025

Manufacturing ERP System | Java, Java Swing, MySQL

- Developed an ERP system for managing production, inventory, suppliers, and purchase orders.
- Implemented production planning, quality control, and real-time reporting features.
- Used JDBC and MySQL for efficient database management and operational data tracking.

## ORGANISATIONS

**VSIT Tech committee,** *Technical Committee Member | Marketing,Anchoring,Voluteering* 12/2023 – 12/2023

Technical Committee Member | VSIT

- Contributed to organizing technical and cultural events.
- Supported event coordination, logistics, and volunteer management.
- Promoted events across **10+ classrooms**, increasing student awareness and participation.
- Anchored an E-Sports tournament attended by **100+ participants and spectators**.

**D.Y. Patil Technical Committee,** *Marketing Head,Event Manager,Crowd Management head*

Founding Member & Core Committee Member | D.Y. Patil Technical Committee *(2 Years)*

- Led marketing, event management, and inter-college outreach initiatives.
- Coordinated volunteers, logistics, and crowd management for large-scale events.
- Collaborated with faculty and committee members to successfully execute technical and cultural programs.
- Supervised and coordinated a team of **20+ volunteers** during technical and cultural events.
- Managed crowd control and event operations for gatherings of **200+ attendees**.
